

AUTOMOBILE CLUB DE MONACO (ACM) – ENVIRONMENTAL POLICY

The Automobile Club de Monaco is one of the Principality's oldest sporting associations. The club was originally founded in 1890 by passionate cyclists, but quickly evolved into motor sports. The first Rallye Automobile Monte-Carlo was organized in 1911.

In line with the Monegasque Government's climate goals, ACM is committed to reducing its environmental impact and promoting a more sustainable, socially responsible motorsport.

Scope and mission

ACM's environmental policy applies to all motor races organized by the association (Formula 1 Grand Prix de Monaco, Grand Prix de Monaco Historique, Monaco E-Prix, Rallye Automobile Monte-Carlo, Rallye Monte-Carlo Historique, E-Rallye Monte-Carlo and Concours d'Elégance) and to all its event-related areas.

Its vision is to act on various levels :

- 1) as an organizer of more sustainable races
- 2) as a committed stakeholder in the Monegasque and French territories
- 3) as an association concerned about the impact of its daily activities.

Strategic Objectives

Focusing on the key impact areas of the FIA Environmental Accreditation Programme, ACM identified several priority areas for which targets and actions were defined using the SMART model. Efforts on these main objectives include :

- 1) Avoiding, reusing, and recycling waste**
 - ✓ Promote waste segregation at all events
 - ✓ Prioritize rental and reuse of equipment
 - ✓ Implement upcycling using event-collected materials
- 2) Reducing CO₂ emissions across all event areas, particularly in relation to energy, logistics and transport**
 - ✓ Work with local suppliers to limit transport emissions
 - ✓ Reduce generator use; switch to renewable energy
 - ✓ Encourage public and shared transport for staff and spectators
- 3) Creating regional and social value**
 - ✓ Partner with local associations (e.g., promoting social reintegration)
 - ✓ Enhance accessibility and inclusion at events
 - ✓ Engage youth and schools through activities and volunteering

Principles of action

To achieve its goals, ACM follows six core principles :

- **Comply** : with current regulations and anticipate future changes in environmental legislation,
- **Measure & monitor** : impacts (waste, energy, water, travel) and identify improvements,
- **Implement** : and support concrete actions across all stakeholders,
- **Collaborate** : with local environmental and social associations,
- **Train** : all stakeholders involved (drivers, teams, volunteers, media, public authorities, suppliers, spectators etc.),
- **Communicate** : transparently about ACM's environmental commitments and performance.

ACM's commitment to environmental sustainability is part of an ongoing journey that relies on the active engagement and shared responsibility of all stakeholders — including staff, suppliers, partners, public authorities, and spectators.
